

Town Explorer Instructions!

Split your team in half and get 2 town maps from a tutor, one for each half of your team to work on!

The tutor will tell you what kind of path or circuit you should make with each map! Here's a reminder on what they are!

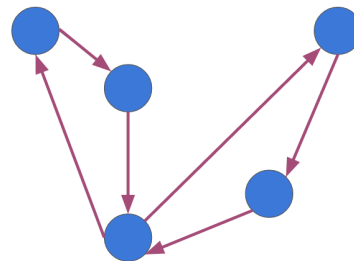

A Eulerian Path

A Eulerian visits each **line** exactly once.

Each line visited!

A Eulerian Circuit

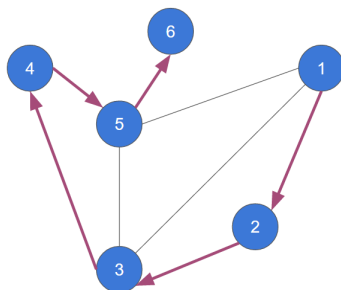

A Eulerian visits each **line** exactly once.

And Returns to the circle it started at.

Each line visited!
And Back to the start!

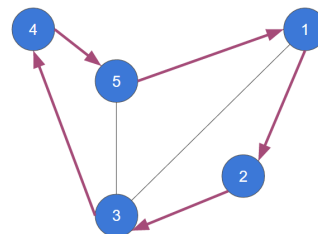

A Hamiltonian Path

A hamiltonian circuit visits each circle exactly once.

All circles visited!

A Hamiltonian circuit

A hamiltonian circuit visits each circle exactly once and then goes back to where it starts!

All circles visited!
And returned to start!

Once you have solved both of your maps, go back to the tutor to get your answer checked and get a chance to collect a coin!
