

Tutor Pictionary Instructions

Each group will split in half. Each half-group needs the student handout and 2 grids. Make sure that the two halves are far enough apart that they can't see or hear each other!

Here are some ideas for images the groups could make with a 5 x 5 grid:

- The Letter C
- The Letter E
- The Letter O
- The Letter P
- The Letter D
- The Letter F
- Multiplication symbol
- Plus symbol
- Divide symbol
- The number 4
- The number 6
- The number 9
- Smiley face
- The word "Hi"
- Triangle
- Love heart
- Diamond

Here is a reminder on how to convert an image into binary:

When a group is ready to send a message they will need a Delivery Tutor who will help transfer messages between the two halves of the group.

When it's time to take the binary message from one half of the team to the other **Don't Forget to ask what the answer is!!**

Let the other team have as many guesses at the answer as they want. If they give up guessing, go back to the other half of the team and help them pick an easier-to-guess image to use for their next attempt.
