# Substitution Cipher (page 1/2)

Our intel informs us that the collection of emoji on the next page contains the name of a secret agent and a password.

Work out what the emoji translate to and find the secret agent and tell them the password.

The following is a chart showing the frequency of the appearance of emoji in the text. You can compare this to the frequency of letter use in english we showed you earlier.

For some reason some of the columns in the chart are *coloured*...
