

Building Challenge!

Build a bridge that supports the most M&Ms!

We'll see how well they do at the end, you get all the M&Ms your build holds!

Rules:

Only 10 Pieces of A4 Paper

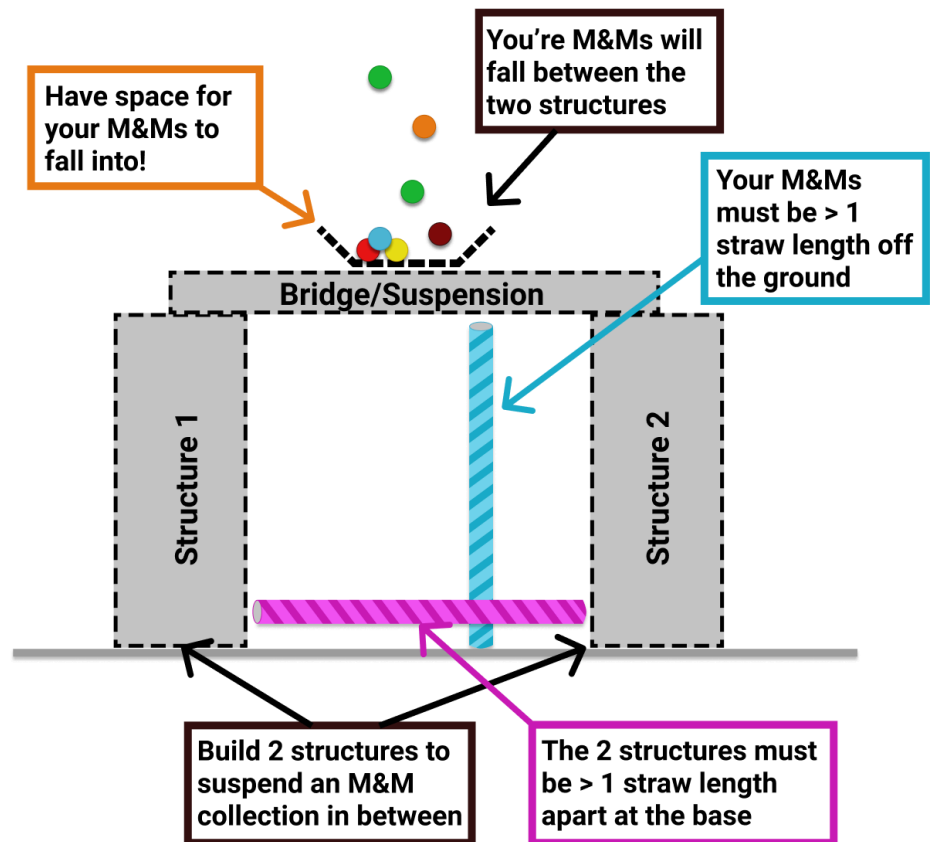

No other materials

5 minutes planning time

25 minutes building time

Tips:

Test early and test often!

You have some lollies to test with, use them to make sure your bridge works! If it doesn't work, figure out what went wrong and fix it!

Communicate!

Make sure you're utilising your whole team, maybe you can split up into sub teams. But make sure you know how all the bits will connect when you join them together.

Be creative with the paper!

You can do whatever you want to it, not just folding! The sky's the limit!
