

PyGame Zero Cheatsheet

Basics

Calling the Pygame zero module

```
import pgzrun
```

Running the game

```
pgzrun.go()
```

Updating the game, by running code on loop every frame

```
pgzrun.update()
```

Clearing the screen

```
pgzrun.clear()
```

Screen

Setting height and width of screen to 100

```
HEIGHT = 100
```

```
WIDTH = 100
```

**Coordinates
(x, y) of top
left corner of
screen: 0, 0**

Displaying graphic on screen

```
pgzrun.draw()
```

Displaying text on screen

```
pgzrun.draw.text('GPN', (0,0))
```

Events

Checks if actor collided with another actor

```
image.colliderect(image2)
```

Time

Calling the time module

```
import time
```

Starts counting seconds (like a stopwatch)

```
time.time()
```

Graphics

Creating an image from a file

```
image = Actor('name_of_file')
```

Drawing images on screen

```
image.draw()
```

x position of image left edge

```
image.left
```

Coordinates of the image

```
image.pos = (10,20)
```

x position of image right edge

```
image.right
```

y position of image top edge

```
image.top
```

y position of image bottom edge

```
image.bottom
```
